Projects

Tbobo

04.2022 – present

A cab orderering App

Tbobo is a cab ordering App like Uber, where a rider is connected to the nearest available driver. It operates across Nigeria and its environs, fully operational at Lagos, Nigeria for the moment.

The Job was contracted to Abos Technology and we were four developers that worked on it. Two Fullstack Engineers (I included), A frontend engineer, and a mobile Developer.

The app comprises a mobile app using microservices and an admin dashboard.

I worked majorly with the other frontend developer on the Admin dashboard and assisted the backend developer on some APIs calls.

Some of the technologies I used during this development are React, GraphQL,Nodejs, SocketIO,MySQL,Sequelize,Paystack payment gateway,sass
